How licences affect optimisation

The licence controls both access and optimiser strength. Higher licence tiers allow the timetable engine to test more strategies, retry more patterns and use deeper repair logic.

Optimiser tier guide

Licence	Optimiser	Practical strength
Demo Licence	Basic Optimiser	Few strategies, limited attempts, presentation use.
Trial Licence	Trial Optimiser	Controlled evaluation strength.
Standard Annual	Standard Optimiser	Normal timetable generation for simpler structures.
Professional Annual	Professional Optimiser	Advanced repair and stronger recovery.
Premium Rollout	Premium Optimiser	Strongest school-facing optimiser.
Master/Admin	Master/Admin Optimiser	Owner-only maximum optimiser for internal diagnostics.

Important limitation

Even the Master/Admin Optimiser cannot solve mathematically impossible data. It gives the system more opportunity to find a solution before reporting issues.
